

Power Tug™

Battery-Powered Material Handling Equipment

The **Power Tug™** is designed to promote productivity with minimal manpower by mobilizing up to 5,000 pounds with ease. It has a mono-drive wheel with a stabilizing swivel caster that enables the unit to mobilize loads over uneven surfaces with complete control. It's body equipped with an electric actuator accomodates various lead heights.

If It Rolls... We Can Move It.™

Power Tug™

FEATURES AND BENEFITS

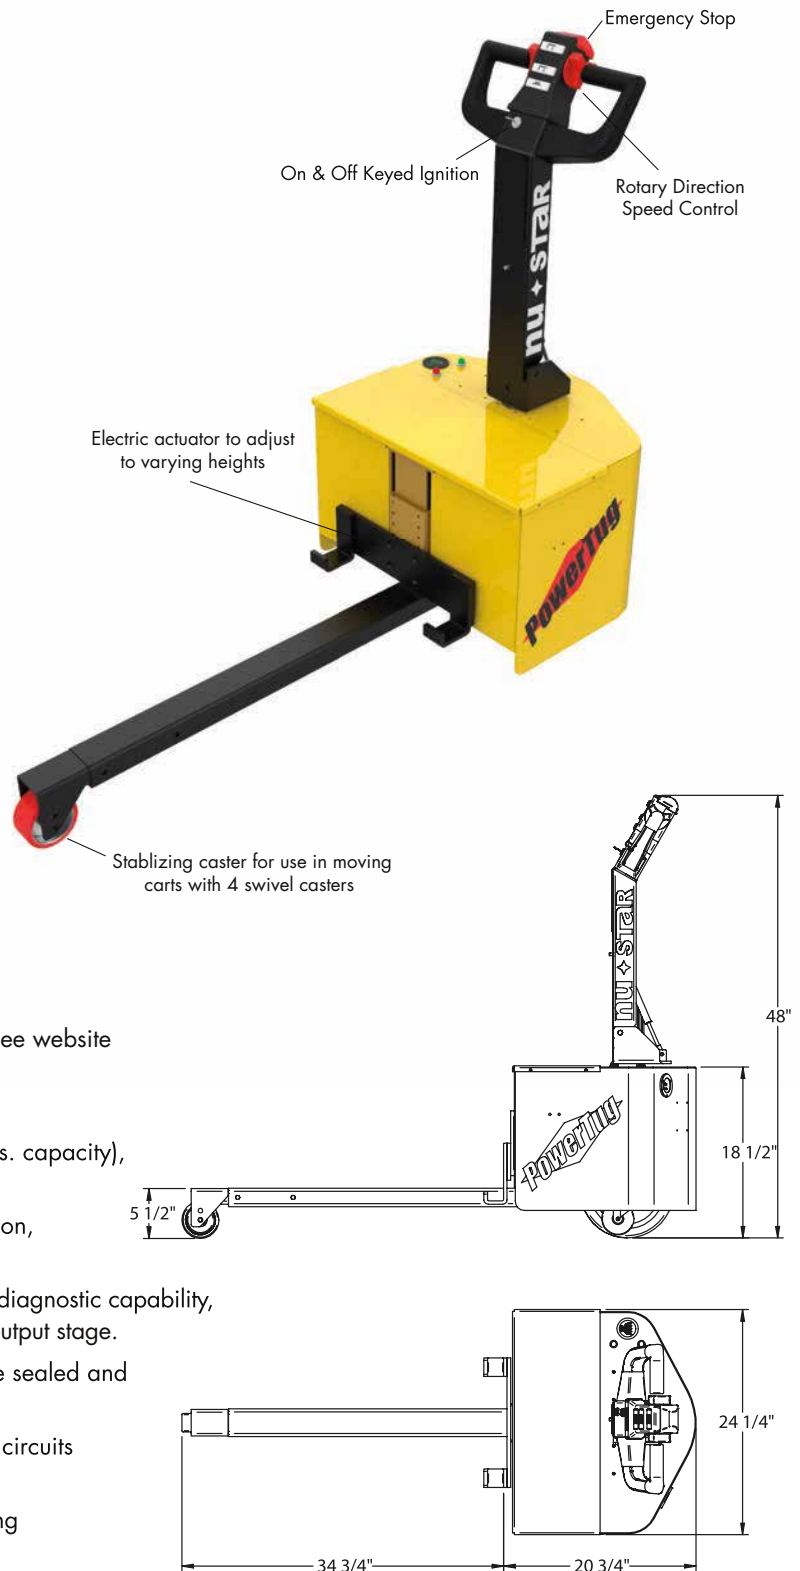

- 24-volt DC, 600 watt motor for 5,000 pound push/pull capacity
- Mono-drive wheel for stable performance on uneven surfaces
- Fingertip controls for operator convenience and ease-of-use
- On-board charger for long-lasting, efficient operation
- Automatic braking and emergency reverse protection improves operator safety
- Fully programmable control system with diagnostic features to adjust speed and acceleration/deceleration based on load and environment
- Ergonomic handles for operator comfort
- Compact size for easy maneuverability
- Polyurethane drive wheel outer with alternative tread patterns and material specifications

OPTIONS

- Audible motion beeper
- Safety strobe
- Dual leg configuration
- Custom attachments for versatile applications
- Versatile standard and custom attachments available - see website

SPECIFICATIONS

- **Motor type:** 24 Volt D.C. — 600W (2,500 lbs. capacity), 1200W (5,000 lbs. capacity).
- **Drive Mechanism:** Planetary Gearbox, 18:1 reduction, through mono-drive
- **Controller:** Fully programmable digital, with diagnostic capability, four quadrant full bridge power output stage.
- **Batteries:** 2 x 60 Amp/hour dryfit, gel type sealed and maintenance free.
- **Battery Charger:** On-Board, 3 stage, 2 x 10 Amp circuits (110v or 240v input).
- **Push/Pull Capacity:** Up to 5,000 lbs. (subject to rolling resistance of load).
